

PUBLIC TRANSPORTATION TO THE VIC

From reducing energy consumptions to saving time, Viennese public transportation conveys many benefits. VIC Staff and visitors are therefore encouraged to use the available public transportation to get to the VIC at all times.

The VIC can easily be accessed using the underground train U1 ("*Kaisermühlen-VIC*") or by using the bus lines 20 and 92.

MILESTONES ACHIEVED UNDER THE BMS TEAM

In order to promote sustainable transportation in the VIC, new bicycle racks have been designed and manufactured by BMS and placed in various locations. This is to facilitate and encourage the usage of bicycles by staff at large. The new design is easy to use, reduces damages to the bicycle's wheels and accommodates more bicycles than the previous design.

The new racks were installed on Park Deck P1 at level -1, thus increasing the total number of available parking slots for bicycles to approximately 500.

ONE MORE STEP TOWARDS ACHIEVING AND MAINTAINING CLIMATE NEUTRALITY

Thirteen charging stations for electric vehicles have been installed in the car parks of the VIC, as part of the Greening the Blue initiative. The main objective is to reduce the type 3 emissions, directly related to the carbon footprint of the staff and suppliers arriving daily at the building.

The project was initiated by Buildings Management Services and implemented in cooperation with *Wien Energie*. The charging stations are powered by 100% renewable energy.

BICYCLE RACKS IN THE VIC

The VIC can be accessed via bicycles through the Gate 2 (from 6:00 till 19:00 hours) and Gate 3 (from 12:00 till 20:00 hours). Ramps at Gate 2 lead directly to Park Deck 1/level -1 (P1/-1).

Bicycle racks are available on level -1 and -3 of Park Deck 1. In total, there are enough space for approximately 500 bicycles in P1. Please refer to the map provided for the available locations in the VIC.

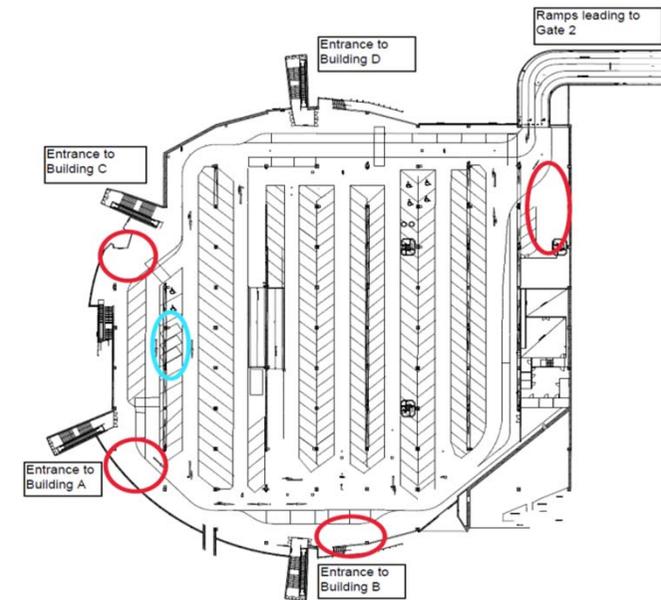

HOW TO PARK THE BIKE...?

ELECTRIC VEHICLE CHARGING STATIONS

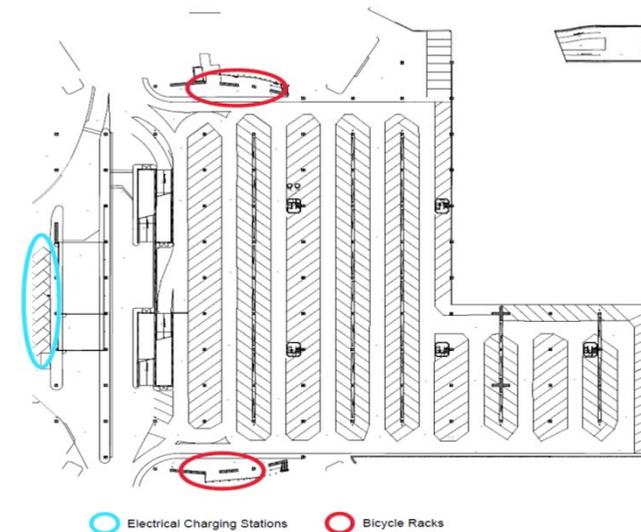

All 13 available electrical charging stations are located in Park Deck 1 (P1). Please refer to the map provided for the exact locations in the VIC.

Park Deck P1/-1: 3 fast charging stations (up to 50 kW) are installed on P1/level -1, which can be accessed directly through Gate 2.

Park Deck P1/-3: 10 charging stations are available on P1/level -3, of which 8 are chargers up to 11 kW and 2 fast chargers up to 50 kW.
