Item 6 of the provisional agenda  
(GOV/2023/56 and Add.1)

# Nuclear Safety, Security and Safeguards in Ukraine

## Corrigendum

1. The first bullet point on page 34 under the heading “Events at the Khmelnytsky, South Ukraine and Rivne Nuclear Power Plants” should read as follows: “On 21 September, the IAEA Support and Assistance Mission to the Rivne Nuclear Power Plant (ISAMIR) reported that a station blackout had occurred in the nearby town of Varash, caused by the emergency shutdown of the 110 kV power line that supplies electricity to the town from the Rivne nuclear power plant (RNPP). Power was restored within one hour and there was no impact on the safe and secure operation of the RNPP.”
2. The second bullet point on page 34 under the heading “Events at the Khmelnytsky, South Ukraine and Rivne Nuclear Power Plants” should read as follows: “On 11 October, ISAMIR reported that the RNPP had completed the scheduled maintenance of Unit 2, including the successful loading of a new type of fuel into Unit 2’s reactor. After it had been restarted, the reactor was reconnected to the grid.”
