Fifth regular session

Agenda item 14
(GC(V)/171)

THE AGENCY'S PROGRAM AND BUDGET FOR 1962

Resolution adopted during the 62nd plenary meeting on 6 October 1961

INTERNATIONAL CO-OPERATION IN THE UTILIZATION OF RESEARCH REACTORS

The General Conference,

(a) Recalling Articles III.A.1 and B.3 of the Agency's Statute whereby the Agency is authorized to encourage and assist research on atomic energy for peaceful uses throughout the world, and required to allocate its resources in such a manner as to secure efficient utilization and the greatest possible general benefit, bearing in mind the special needs of the underdeveloped areas of the world,

(b) Noting:

- (i) That a considerable number of research reactors are being built or have begun to operate in Member States; and
- (ii) That in some of these States, experience in nuclear technology is still comparatively limited and problems of programming and effective utilization of these reactors may arise, and

(c) Considering that possibilities of co-operation exist between technically advanced countries and those developing countries which may have problems with their reactor facilities,

Requests the Board of Governors and the Director General to give early consideration to the steps to be taken to promote international co-operation in order to ensure full and effective utilization of the research reactors in such Member States as may request assistance towards that end.
