Twenty-fifth regular session

Item 7 of the provisional agenda
(GC(XXV)/640)

GENERAL DEBATE AND ANNUAL REPORT FOR 1980

Corrigendum in the annual report for 1980

Paragraph 14 of the Introduction should read as follows:

14. The amount of nuclear material under safeguards again increased substantially. The amount of plutonium contained in irradiated fuel rose by 30%, to 78 tonnes (that of separated plutonium, however, decreased from 8 tonnes to 5 tonnes), that of low-enriched uranium rose by 18%, to 13 872 tonnes, and that of source material rose by 24%, to 19 097 [3] tonnes. The amount of highly enriched uranium under safeguards remained at 11 tonnes.
