MEASURES TO STRENGTHEN INTERNATIONAL CO-OPERATION IN  
NUCLEAR SAFETY AND RADIOLOGICAL PROTECTION

PROHIBITION OF ARMED ATTACKS ON ALL NUCLEAR INSTALLATIONS

Draft resolution submitted by Argentina and Mexico

The General Conference,

(a) Recalling IAEA General Conference resolution GC(XXIX)/RES/444, and in particular its operative paragraphs 3 and 4,

(b) Aware of the fact that an armed attack on a nuclear installation could result in radioactive releases with grave consequences within and beyond the boundaries of the State which has been attacked, and

(c) Convinced of the need to prohibit armed attacks on all nuclear installations and of the urgency of concluding an international agreement in this regard,

1. Takes note of the discussions in the Board on this matter;
2. Requests the Director General to initiate detailed technical studies on the possible radiological consequences of an armed attack on nuclear facilities;
3. Appeals to the Member States to provide information to the Agency relevant to such studies; and
4. Further requests the Director General to keep the Board and the General Conference informed about the progress in this regard.
